

Components:

```
vmware identity manager 3.3.3
vmware workspace one access 20.10.0.1
vmware workspace one access 20.10.0.0
vmware identity manager 3.3.5
vmware vrealize automation 7.6
vmware identity manager 3.3.4
vmware workspace one access 21.08.0.1
linux linux kernel -
vmware workspace one access 21.08.0.0
vmware identity manager 3.3.6
vmware vrealize automation *
```

Description:

VMware Workspace ONE Access and Identity Manager contain a remote code execution vulnerability due to server-side template injection. A malicious actor with network access can trigger a server-side template injection that may result in remote code execution.

Main problems:

```
94 "Improper Control of Generation of Code ('Code Injection')"
```
