

Components:

Description:

The SoJ SoundSlides plugin for WordPress is vulnerable to arbitrary file uploads due to missing file type validation in the `soj_soundslides_options_subpanel()` function in all versions up to , and including, 1.2.2. This makes it possible for authenticated attackers, with Contributor-level access and above, to upload arbitrary files on the affected site's server which may make remote code execution possible.

Main problems:

434 "Unrestricted Upload of File with Dangerous Type"
