

## Components:

```
nvidia gpu display driver *  
nvidia nvs -  
nvidia rtx -  
nvidia quadro -
```

## Description:

NVIDIA GPU Display Driver for Windows contains a vulnerability in the user-mode layer, where an unprivileged user can cause an out-of-bounds write, which may lead to code execution, information disclosure, and denial of service.

## Main problems:

787 "Out-of-bounds Write"
