

Components:

gpac gpac 1.0.1

Description:

The binary MP4Box in Gpac from 0.9.0-preview to 1.0.1 has a double-free vulnerability in the `gf_text_get_utf8_line` function in `load_text.c`, which allows attackers to cause a denial of service, even code execution and escalation of privileges.

Main problems:

415 no CWE Description available
