

# Baudrate

AI - generated content

- 110 - Very old teletypes, early modems
- 300 - Acoustic couplers (early modem tech)
- 1200 - Early dial-up connections
- 2400 - Legacy serial devices
- 4800 - GPS modules, legacy hardware
- 9600 - Most common default for microcontrollers, sensors
- 14400 - Early modem standard
- 19200 - Industrial devices, data loggers
- 38400 - Legacy Linux serial consoles
- 57600 - Wireless modules (e.g. XBee, HC-12)
- 115200 - Common for modern dev boards (Arduino, ESP32)
- 230400 - High-speed data transmission
- 460800 - Debug interfaces, fast UARTs
- 921600 - Advanced debugging, flashing tools
- 1000000 - Specialized hardware, USB-Serial bridges (e.g. FTDI, CP210x)
