

Problem:

Do you want to list **all reachable IP's** in the network?

Solution:

In this example your ip is 192.168.178.13

Use **nmap -sn 192.168.178.1/24**

Replace last ip part **13** through **1/24**

Starting Nmap 7.95 ( <https://nmap.org> ) at 2025-12-13 13:37 CET

Nmap scan report for target (192.168.178.1)

Host is up (0.015s latency).

Nmap scan report for 192.168.178.23

Host is up (0.035s latency).
