

brizy brizy *

Description:

The Brizy Page Builder plugin for WordPress is vulnerable to arbitrary file uploads due to missing file type validation in the 'storeUploads' function in all versions up to, and including , 2.6.4. This makes it possible for authenticated attackers, with Contributor-level access and above, to upload arbitrary files on the affected site's server which may make remote code execution possible.

Main problems:

434 "Unrestricted Upload of File with Dangerous Type"
