

## Components:

```
solarwinds serv-u 15.2.3
```

```
solarwinds serv-u *
```

## Description:

Microsoft discovered a remote code execution (RCE) vulnerability in the SolarWinds Serv-U product utilizing a Remote Memory Escape Vulnerability. If exploited, a threat actor may be able to gain privileged access to the machine hosting Serv-U Only. SolarWinds Serv-U Managed File Transfer and Serv-U Secure FTP for Windows before 15.2.3 HF2 are affected by this vulnerability.

## Main problems:

787 "Out-of-bounds Write"
