CVE-2022-40139 - Score: 7.2

Components:

 microsoft windows -
 trendmicro apex one -
 trendmicro apex one 2019

Description:

Improper validation of some components used by the rollback mechanism
in Trend Micro Apex One and Trend Micro Apex One as a Service
clients could allow a Apex One server administrator to instruct
affected clients to download an unverified rollback package,
which could lead to remote code execution. Please note: an
attacker must first obtain Apex One server administration
console access in order to exploit this vulnerability.
