CVE-2023-28501 - Score: 9.8

Components:

rocketsoftware universe *
rocketsoftware unidata *
linux linux kernel -

Description:

Rocket Software UniData versions prior to 8.2.4 build 3003 and UniVerse versions prior to 11.3.5 build 1001 or 12.2.1 build 2002 suffer from a heap-based buffer overflow in the unirpcd daemon that, if successfully exploited, can lead to remote code execution as the root user.

Main problems:

190 "Integer Overflow or Wraparound"
