CVE-2023-23453 - Score: 9.8

Components:

    sick fx0-gent00010 firmware 3.04
    sick fx0-gent00010 -
    sick fx0-gent00010 firmware 3.05

Description:

Missing Authentication for Critical Function in SICK FX0-GENT v3
    Firmware Version V3.04 and V3.05 allows an unprivileged remote
    attacker to achieve arbitrary remote code execution via
    maliciously crafted RK512 commands to the listener on TCP port
    9000.

Main problems:

306 "Missing Authentication for Critical Function"
