# CVE-2024-5431 - Score: 8.8

## Components:

themewinter wpcafe *

## Description:

The WPCafe    Online Food Ordering, Restaurant Menu, Delivery, and
    Reservations for WooCommerce plugin for WordPress is vulnerable
    to Local File Inclusion in all versions up to, and including,
    2.2.25 via the reservation\_extra\_field shortcode parameter.
    This makes it possible for authenticated attackers, with
    Contributor-level access and above, to include remote files on
    the server, potentially resulting in code execution
