CVE-2016-5198 - Score: 8.8

Components:

```
google chrome *
linux linux kernel -
```

Description:

V8 in Google Chrome prior to 54.0.2840.90 for Linux, and 54.0.2840.85 for Android, and 54.0.2840.87 for Windows and Mac included incorrect optimisation assumptions, which allowed a remote attacker to perform arbitrary read/write operations, leading to code execution, via a crafted HTML page.

Main problems:

787 "Out-of-bounds Write"
