CVE-2025-24494 - Score: 7.2

Components:

Description:

Path traversal may allow remote code execution using privileged account (requires device admin account, cannot be performed by a regular user). In combination with the 'Upload' functionality this could be used to execute an arbitrary script or possibly an uploaded binary. Remediation in Version 6.7.0, release date: 20-Oct-24.

Main problems:

22 "Improper Limitation of a Pathname to a Restricted Directory ('Path Traversal')"
